

A "Flow Proof" Story

Soon you will be writing flow proofs in geometry. To get used to the flow of events and what needs to happen or be shown before something else can happen or be shown, let's create a flow of events for the following story.

Chelsey and Mari were going to the movies. Before she could go, Chelsey had to do her chores and brush her teeth. Before she could go, Mari had to walk the dog. They met at the box office and bought tickets together. Inside, Mari bought them popcorn while Chelsey went to the restroom. They found seats and enjoyed the movie. As they were walking out the theater, they discussed what happened and what they liked about the movie. The next day, Mari recommended the movie to her friend, Sarah.

Put the following statements in the correct boxes below to show the sequence of events.

Chelsey goes to the restroom
 Chelsey and Mari discuss the movie
 Mari recommends the movie to Sarah

Chelsey and Mari buy movie tickets
 Chelsey does her chores
 Chelsey and Mari sit down at the theater

Mari walks the dog
 Chelsey brushes her teeth
 Mari buys popcorn

Time Increasing → → →
